

# Integrate IP devices and IP gateways in IQONTROL NEO

In addition to radio components and IR codes, IQONTROL NEO can also integrate IP devices and IP gateways as well as the devices connected to these IP gateways.

Currently, the following IP devices and IP gateways can be integrated:

- Möhlenhoff Alpha
- FRITZ!Box
- Sonos WLAN-Speaker

These IP components are learned directly to the AIO GATEWAY. How to integrate these components, watch the following videos:

## How to connect the Möhlenhoff Alpha gateway and devices

## How to connect the FRITZ!Box gateway and devices

## How to connect Sonos devices
